WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut list (frame cut picture in the plan gives every position):
4 legs 700; 4 side rails 850 (top pair and lower pair, 255 up);
2 top end rails, low end member (90 up), head member (600 up), 550;
6 members 600 laid across: gearbox pair, spindle pair on top of
the lower rails, tub pair hung on 4 drop posts 205 at 445 up;
tank post member 550, end post 560, tank post 995;
2 tank post braces 717, mitred. 16.4 m in all.
Tack on a flat floor, check diagonals within 2 mm, then weld.
Bearing plates 150 x 130 x 6, 40 mm centre hole, four 11 mm holes
70 apart: one under the spindle pair, one under the tub pair,
centres in line (plumb bob) before welding.
Tank post on the centre line; cradle 250 x 250 x 5 on top,
1700 up, two gussets each way. Braces from 1350 up
the post to the front and back top rails, 250 toward the table.
Drill the bolt holes each later section lists; prime and paint.
Check: frame sits on all four feet; bearing plate holes in line.
