WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A disc 446 across, 10 thick, with a 60 mm feed hole in the centre.
Cut with a jigsaw to a scribed circle; file the edge smooth.
The lid rests on the tub rim; it overhangs 8 mm all round.
Two over-centre clamps on the tub, 45 degrees each side of the front, hook over the lid edge; no tools to open or close.
The right-hand clamp's lever carries the interlock pin on the brake cable: it cannot open unless the brake is set.
The feed pipe stops 15 mm above the lid: the lid lifts straight up and off without moving the hopper.
Check: with the clamps shut the lid cannot be lifted by hand.
