WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cone 140 across the bottom, 340 across the top, 220 tall.
Flat pattern: a ring sector, inner radius 169, outer radius 411,
149 degrees, plus a 15 mm seam lap. Roll, rivet the seam, seal.
Bottom: a 140 mm disc with a 32 mm hole, riveted and sealed.
Feed pipe 44 x 6, 145 long, welded or bonded under the hole.
Screen: 2 mm punched stainless sheet in a 360 mm flat bar rim,
resting on the hopper rim (lifts off for cleaning).
Fit: the cone drops into the support ring and wedges there.
The pipe end is 15 above the lid and over the bowl centre.
Check: water poured in runs out of the pipe with none at the seam.
