WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A shallow box round both pulleys: 566 x 316 x 60 tall.
Fold a tray (bottom and sides) and a separate lid (top), so the
belt can be fitted and checked with the tray off.
Top: 40 mm holes over the gearbox shaft and the spindle.
Bottom: 32 mm hole for the spindle foot; the union stays below.
Four hangers 25 x 3 flat bar, 50 tall, bolted to the top and to
the undersides of a gearbox member and a spindle member.
Speed sensor: on a bracket under the top, beside the driven pulley.
Fit: 6 mm clear of both pulleys and the belt all round.
Check: no finger can reach a pulley through any opening.
Never run the machine with this guard off.
