WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Head plate 375 x 110 x 6, standing on the frame's table end.
Shelf 184 deep, welded square to the plate 677 above the ground,
with two triangular gussets 90 x 90 under it, 200 in front
of and 59 behind the centre line (clear of the bearing nuts).
Shelf cut-out 130 x 280 between the bearings: the pitman eye
swings through it.
Plate holes: two 9 mm into the head member, two into the top
end rail (four M8 bolts).
Shelf holes: two pairs of 12 mm holes 95 apart for the head
shaft bearings, 330 apart across the machine.
Head shaft 20 mm, 410 long; eccentric: 60 mm disc with its 20 mm
bore 7.5 off centre (15 mm stroke), two set screws.
The bump stop bracket bolts beside it on the top end rail (121).
Check: shelf square to the plate; shaft turns freely by hand.
