WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Eye: a ring 84 across from 12 mm plate with a 61 mm bore and a 60 mm bore bronze bush pressed in (it runs on the eccentric).
Arm: 22 x 12 flat bar welded to the eye; 111 mm between the eccentric centre and the pin centre.
Pin end: 12 mm hole; a 12 mm pin with washers and an R-clip joins it to the cheeks under the deck.
Fit: the arm rises at 46 degrees from the head to the deck; the eye swings 3 mm clear of the shelf cut-out. The pin pulls the deck from the head end of the slot in the cheeks.
Grease the bush; it must turn freely with no side play.
Check: with the stop backed off, the deck moves 15 mm per turn.
