P1	Making sketch for the prototype build plan	2026-10-01	AC

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Two side plates shaped round both sprockets, 12 mm outside the chain, joined by a 26 mm rim strip; 703 long, 253 tall.

Holes: 28 mm for the crank axle and for the jackshaft.

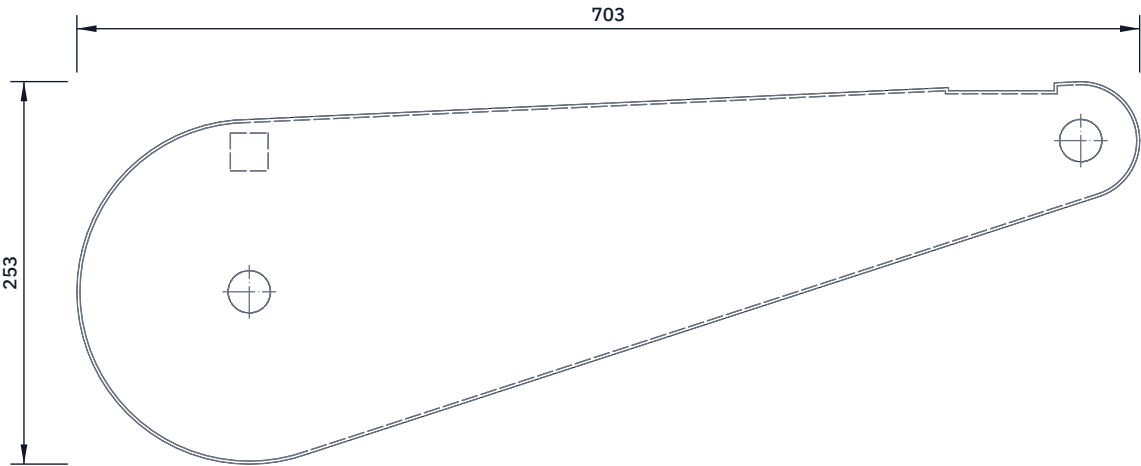

Where it crosses the left gearbox member the bottom is flat and rests on the member (one M6 bolt).

Tab 25 wide to the pedal post (one M6 bolt).

Make the outer plate removable for fitting the chain.

Fit: inner plate 4 mm off the gearbox; outer plate 2 mm inside the crank arm.

Check: turn the cranks a full turn; nothing rubs.
